Keewatin Windpower Proceeds with Acquisition of Sky Harvest Windpower

In connection with its proposed acquisition of Sky Harvest Windpower Corp., Keewatin is pleased to announce that it has engaged Stirling Mercantile Corporation to prepare a fairness opinion concerning the transaction. Sky Harvest holds the land rights to develop a wind power project on approximately 8,500 acres of land located in southwestern Saskatchewan. The company has completed wind resource assessments on the property and is proposing the construction of a 150 megawatt facility.

Keewatin's Board of Directors anticipates that the fairness opinion will support the terms of the proposed acquisition whereby it will issue 1.5 shares of its common stock for each currently issued share of Sky Harvest, representing an aggregate of 17,343,516 shares. The advanced stage of the Sky Harvest project was considered in management's valuation. Both companies are prepared to complete the acquisition immediately following the receipt of the fairness opinion and the completion of an audit of Sky Harvest's financial statements. Current directors of Keewatin own 53% of Sky Harvest's issued and outstanding shares.
